Summary

CCCTRX.com is an entertainment and interactive platform based on virtual currency. Directly operated by CCCTRX.com, it is the first gaming and entertainment platform in the Philippines that uses virtual currency as the lottery result.

The gaming and entertainment industry is a booming industry, however, the online gaming and entertainment industry is hindered by several issues. Security concerns, lack of transparency and social character, unfair odds, high fees, and low returns have led to widespread perceptions of unfairness in the online gaming entertainment industry—and these issues have led to large numbers of potential gamblers shunning it Or turn it into underground gaming.

The CCCTRX.com solution uses blockchain technology to use the real-time market quotations of the world's largest exchange (Binance) as the lottery result to ensure that the platform is 100% fair, just and open. No middleman involved: Players participate in the game, check the rules, and provide liquid assets to complete the payout. Smart contracts protect funds and automatically allocate wins based on betting terms and outcomes. The entire process is completely decentralized, secure and self-regulating.

But CCCTRX.com is not just about better gambling. The platform is

also versatile and scalable: it will start with sports betting and gradually expand to include multiple content and third-party games. It is designed to support the entire ecosystem, including occasional gamblers and high rollers, OEM clients and traditional gaming establishments, as well as third-party developers and affiliates. They all use our TRON digital token: TRX as a bet.

Our vision is to develop such a more advanced gaming solution , add more entertainment , and create the world's leading virtual currency gaming platform. To give you an idea of what we're about to present, we've released a functional I OS prototype (CCCTRX) on the Apple Store. Join us now and start this adventure!

key point

- At some point in our lives, we've all made a bet with someone else
- Gambling was originally a social activity but has lost its social essence
- Traditional betting is highly centralized, leaving players out of power and leaving the bookmaker in control
- By removing the middleman and leveraging blockchain technology, a new era of safe and transparent gaming will come
- CCCTRX.com poised to reinvent gaming as a social event
- Our goal is to add more entertainment and create the world's

leading virtual currency gaming platform.

Keywords: trustless gambling, Ethereum, smart contracts, decentralized systems, prediction markets, blockchain, mobile, social engagement, fun, transparency, security, gamification, partnership, accountability

Introduction

With its unique combination of risk, incentive and potential financial income, gambling has endured allure. From Roman gladiators to the rise of eSports, players are betting on their favorite activities. The global gaming and gambling market is worth as much as \$3 trillion (80% of which comes from underground gaming). As online and mobile channels continue to thrive, the industry is gearing up for further growth.

Still, gambling has always been influenced by the dark side. Frequent scandals of malicious bookmakers and dishonest institutions have severely damaged the reputation of the industry. When bettors lose, they lose everything. And when they win, they may not receive the promised amount. Additionally, high fees and unreasonable complexity discourage potential bettors from participating. In a way, betting has gone from an attractive social event to a risk-laden personal risk.

Even in its fairest execution, traditional gaming remains a highly centralized attempt to disenfranchise players and leave the house in charge. In short, in the long run, the individual inevitably loses his entire capital to the "bookmaker".

We will make gaming entertaining again, creating an innovative, decentralized and transparent platform that combines modern technology with a superior social experience. By doing so, we gain access to segments where the market potential is untapped, such as recreational players who shy away from traditional gaming solutions due to the complexity or trust issues.

With all this in mind, we created CCCTRX.com : a brand new platform built on the blockchain that aims to solve the shortcomings of traditional gambling and offer a range of innovative features. Starting in sports, players and a group of friends bet each other on the outcome of a game rather than the odds set by the dealer. Regardless of the outcome of the betting, the money stays with these groups and doesn't flow into the broker's pocket. Blockchain is the perfect technology to support this gaming revolution.

Our goal is to become the leading virtual currency gambling platform in the market. Sound ambitious? We are so confident. We have the team, vision and passion to make it happen. Read on to learn more.

What is CCCTRX.com and why choose it?

Broadband and mobile connections have brought gaming to millions of people. But centralized traditional gaming suffers from serious structural flaws (see the "Industry Challenges" section). The emergence of blockchain technology brings an opportunity to redefine the industry, providing a solution that takes all the essence of traditional betting and removes all the dross.

CCCTRX.com is a virtual currency gambling platform that allows people to gamble with other players without the use of “middlemen” such as brokers or betting providers. It is a completely decentralized and secure solution based on Ethereum smart contracts. All betting is conducted using the TRON token TRX .

CCCTRX.com is safe, transparent, proven fair, and simple to use. It's simple: you create a bet on one or more events, specify the minimum amount, and the rules for the distribution of the winnings. Others join the betting (through their own event predictions). After the event, the smart contract automatically calculates the winnings and awards TRX tokens according to the agreed distribution rules (e.g., the winner gets the full reward) .

of CCCTRX.com , flip a coin with your friend and say "I bet you £5, heads win" and your friend in Manchester joins the bet. Whether you win or lose, the money stays between the two of you .

However, in addition to the basic gaming mechanics, CCCTRX.com

will offer a range of industry-leading features and benefits (please refer to the "Core Benefits" section), including:

- Introduces a high level of simplicity for entertaining players, but provides advanced features for top players and high rollers
- Designed from the ground up and delivers viral uptake (minimizing player purchase costs) well beyond the standard "friend refer a friend" referral program
- Supports unlimited bonuses and massive bets
- Powerful gamification elements
- Respect for privacy
- Multi-channel experience: website, iOS, Android (and other marketplace-related platforms)
- Future-proof, ready to introduce additional multi-currency gameplay
- Designed for rapid ecosystem uptake (eg, open source, 3rd party integration)
- Built as modular technology components, enabling near-turnkey solutions at low custom costs
- A custom solution that offers fast processing times at a lower cost and is backed by a deflationary, highly liquid, dedicated token (TRX)

market opportunity

The market potential of virtual currency gambling platforms is huge. Recent estimates put the global gaming and gaming market worth as much as \$3 trillion (both regulated and unregulated). Licensed gaming alone is worth more than \$500 million.

With the increasing penetration of broadband and smartphones, the market is constantly shifting from traditional channels to online channels. The value of the online betting industry has reached nearly \$50 billion, and mobile platforms are exploding at more than 40% per year. In the EU alone, the average mobile gaming spend per adult increased from \$1 in 2010 to \$15 in 2017.

Football betting dominates the industry, accounting for an estimated 65% of total spending. Therefore, CCCTRX.com will initially focus on the sports betting segment, allowing us to scale our business and achieve an operating profit as quickly as possible. However, the platform will soon integrate other sports and non-sports betting content (eg, hockey/basketball, eSports, fantasy, social events, and possibly casino games as well).

Because of our focus on simplicity and security, we believe that we will also attract non-bettors: due to the complexity and lack of transparency of traditional gaming solutions, a large number of recreational players have yet to actually gamble.

Industry Challenges

The online gambling industry is plagued by a series of serious problems. Among other considerations, the odds are very favorable to the bookmaker, payouts are not always cashed, and frequent winners are restricted or prohibited. Markets lack transparency and security, high fees, low returns, and low social participation. These factors reduce the number of potential bettors participating in such systems.

More specifically, here are the key industry challenges that CCCTRX.com is addressing:

- unfair conditions

Over time, the dealer always wins. The odds are very favorable for the bookmaker. In this case, the player who wins frequently will be banned. If there are no winners in a bet, the casino "gets the full bet." Also, games that can result in huge losses for bookmakers are sometimes called off. At CCCTRX.com , all bets have a winner, the money is always in the player's hands, and we always welcome winners.

- lack of transparency

Bookmakers operate in secrecy, not letting customers know how the odds are designed, or how much money is invested. Some even started to manipulate the odds after the game. At CCCTRX.com , the set odds are

all visible on the betting page.

■ Gaming restrictions and low returns

The operator limits the player's wager amount due to payment matching liability. Faced with low limits and unattractive odds, bettors often seek higher returns on ground bets. We have no limits on odds and returns, and plan to create a high roller club for truly massive gaming.

■ potential complexity

Successful bettors need a wealth of information: odds, water levels, handicaps, taps, draws... The list is almost as extensive as betting options. Complex registrations and interfaces compound the problem. For recreational players, this can be overwhelming. CCCTRX.com is designed to be as simple and intuitive as possible.

■ security concerns

Recreational gamers are more concerned about safety than regular gamers. The centralization of betting providers leaves all bettors vulnerable to external and internal attacks, putting players' funds and financial information at risk. CCCTRX.com 's decentralized setup and smart contracts provide unparalleled player protection. Say goodbye to outdated payment methods and slow payments and credit cards, wire transfers, deposits and other outdated payment systems. The virtual currency wallet is recharged and withdrawn , and the payment reception is no longer delayed.

- high cost

Most gaming operators charge fees for everything - even deposits. Alternatively, they hide fees on every transaction (for example, adding an exchange rate premium). Players pay only a small fee from their winnings to cover third-party service fees.

CCCTRX.com Solutions

In short, by shifting power from gaming providers to players, CCCTRX.com solves the biggest challenges of traditional gaming. Players participate in the game, review the rules, and provide liquidity to realize payouts. The entire process is completely decentralized, transparent, and self-regulating.

Blockchain technology can operate networks without middlemen, a major source of structural problems and vulnerabilities in traditional systems. Smart contracts not only ensure that wagering terms are respected and not manipulated, but also protect player funds in escrow accounts. Only when the game is over will these funds be released to the betting winner. All this happens automatically and seamlessly. The CCCTRX.com platform consists of the following three core components:

- Core Architecture
- Application layer
- Currency real-time quotes

- Core Architecture

This is the blockchain-based engine that powers our entire solution. It includes virtual currency wallets, smart contracts and a range of tools that enable transparent, fair and secure gambling. The core architecture meets all the requirements to support a successful gaming network: stability, versatility, scalability, security, performance and cost-effectiveness.

- application layer

Advanced technologies also have a limited role: the application layer is where the magic really happens. This is a set of innovative internal and third-party applications built on top of the core architecture. With full support for website and mobile platforms, all applications will be as intuitive and attractive as possible.

- Currency real-time quotes

CCCTRX.com uses the real-time market data of the world's largest exchange (Binance) as the lottery result to ensure that the platform is 100% fair, just and open.

CCCTRX.com Core Architecture

The CCCTRX.com core framework makes our solution powerful and outperforms the competition. The technology consists of a virtual currency wallet and a series of tools and smart contracts that enable

transparent, fair and secure gambling on the platform.

smart contract

Smart contracts are essentially digital contracts. When a certain condition is met (for example, all matches in the game are over), the code will execute automatically. Once a smart contract is executed, its terms cannot be changed.

At CCCTRX.com , all games are set up as smart contracts. They specify the following parameters:

- The buy-in amount of the game
- Real-time market results of the currencies involved in the game
- After the game is completed, the distribution of funds

Smart contracts are essential to prevent any form of internal or external manipulation: once they are deployed on a website , no party can change the terms and manipulate the game. Human error is also unlikely. Immediately after the draw result is obtained , the winner will receive funds using a transaction controlled by a smart contract.

All game data is permanently stored in my order book, and smart contracts are a key tool to ensure that all games on the CCCTRX.com platform are safe and transparent.

Graphical smart contract creator

We are planning to develop a graphical tool to create and configure smart contracts for internal and external use (e.g. for use by third-party developers). This will allow us to quickly add new gaming options to the CCCTRX.com platform without incurring significant internal costs. This tool will also allow us to bring in third-party gaming establishments and customize the core architecture for their needs more quickly.

With the graphical smart contract creator, third-party developers will be able to focus on the entertainment and monetization aspects of the software, without having to spend time coding and deploying complex smart contracts.

Developer SDK

The CCCTRX.com core architecture is designed to support applications developed by in-house and third-party developers. To assist in the creation and deployment of third-party applications, we will release a software development kit (SDK). The SDK will contain a range of tools, libraries, guides and templates to allow external developers to easily and quickly integrate their applications into the CCCTRX.com platform.

Third Party Commercial Development

As part of our business model, the CCCTRX.com core architecture will be provided to third parties including traditional gaming establishments. In the specific case of traditional gaming establishments, the transition to our solution will bring them great benefits, including:

- Reduce the complexity of its blogging platform
- Ability to provide instant payouts to players
- The highest level of security, player protection and transparency

CCCTRX.com application layer

The application layer consists of all gaming and gaming applications that players access through the CCCTRX.com platform. We will support the most common web and mobile platforms, including iOS and Android operating systems. The application layer also contains all the backend solutions and applications.

The CCCTRX.com platform will consist of internally and externally developed applications, built on the CCCTRX.com core architecture and powered by TRX tokens. This will ensure a wide range of gaming options for players while retaining the benefits of our robust security technology. Our goal is to provide the most convenient and attractive gaming experience on the market. Every in-house developed application needs to adhere to extremely high quality and design standards.

how it works

Open the game module on the homepage of the website, you can view the games in the three currencies of BTC/ETH/BNB. The game of each currency has 1 minute, 3 minutes, 5 minutes of gameplay, and each game has baccarat, odd and even, size, guessing numbers and other modes. Click the corresponding game mode in the currency you want to play to enter the game betting page. The game betting page will display the current issue number, lottery results, currency real-time market and other information. After selecting the game you want to play on the betting page, select the corresponding game chip below. Then click the area you want to bet, and the chips will jump to the area you choose. After confirming the amount you want to bet, click the confirm button to complete the bet (Note: betting cannot be made when the market is closed).

Click the Clear button to clear the amount in the area. After the bet is completed, if you click the Cancel button, all the bets in the current period will be cancelled (Note: The closed/opened bets cannot be cancelled). If you just want to cancel part of the betting order, you can select the cancel button in the corresponding order in My Orders at the bottom of the page.

TRX token

TRX is the main token of the CCCTRX.com platform, with functions such as deposit, withdrawal, and games. It enables smart contracts to be used, which in turn is an important boost to platform security and transparency.

Players can earn TRX tokens during and after the token sale on various crypto exchanges or directly through virtual currency wallets .

Core benefits

Our plan is not to be the first and only blockchain-based gaming platform, but we will offer a range of advantages and features that will allow us to differentiate ourselves from our competitors, including unique disruptive innovations.

These are the key competitive advantages of our solutions and the reasons why players will choose CCCTRX.com over traditional carriers or other solutions in the crypto space:

- easy to use

Everything at CCCTRX.com is as simple and intuitive as possible: no complicated odds or conditions. The interface is designed to be very easy to understand for non-connoisseurs and recreational players. Simple Account Creation Registration is very simple.

- contract security

CCCTRX.com smart contracts protect players' funds and distribute winnings automatically. No human intervention means that there is no possibility of human error or tampering.

- Platform Authority

CCCTRX.com uses the real-time market data of the world's largest exchange (Binance) as the lottery result to ensure that the platform is 100% fair, just and open.

- Financial security

CCCTRX.com has multiple large fund pools to ensure that all users can withdraw funds quickly. At the same time, the platform supports a single withdrawal of up to 500,000,000.00 TRX. Really achieve financial security, large amount of worry-free.

- Withdrawal freedom

CCCTRX.com withdrawals arrive quickly, and the arrival time is subject to the arrival time of TRON. Let you enjoy the royal enjoyment like being at home.

- Rich in activities

CCCTRX.com continues to launch various rich and powerful activities, and offers non-stop discounts, allowing you to make real money.

- security

CCCTRX.com adopts 256-bit SSL encryption technology and strict security encryption management system, so you have no worries.

- Intimate service

CCCTRX.com provides 7X24 hours customer service and considerate service.

- Business is legal

CCCTRX.com holds the PAGCOR (Philippine Amusement and Gaming Corporation) gaming and online casino license issued by the Philippine government, which is protected by local laws.

our team

We are an international team of Silicon Valley entrepreneurs, corporate executives, talented product managers, software engineers, marketers and graphic designers. We believe that through cutting-edge technology and truly boundless passion, we can revolutionize the online gaming market.

Compliance and Security

CCCTRX.com is an online gaming platform operator that holds a legal business license from the Republic of the Philippines and Macau, and is protected and bound by its relevant laws. Before logging in to use the platform services, please read the following carefully, and confirm

that the use of platform services complies with the laws and regulations of the country and place of residence. This platform does not assume any responsibility caused by the user's violation of local regulations. Once users log in to the platform, they are deemed to have fully accepted all the regulations of the platform.

1. In order to avoid disputes when betting on this website, please read the rules of this platform carefully before entering the website. Once the customer enters this website to place a bet with "I agree", it is deemed to have accepted the entertainment platform. All agreements and rules.

2. Please modify your login password and fund password regularly. Members are responsible for ensuring the confidentiality of their account and login information. Any online betting made with the member account number and password will be deemed valid. Please change your password from time to time. If the account password is stolen, the platform will not be responsible for the betting.

3. Terms related to betting:

① If the online bet is unsuccessfully submitted, the bet will be deemed invalid.

② When the player disconnects automatically or forcibly before the result of the lottery draw, it will not affect the lottery draw settlement.

③ If the official website does not draw the lottery or the lottery result is wrong, the platform will refund the award according to the actual

situation;

④ In the event of irresistible disasters, hacker intrusion, and data loss caused by network problems, the announcement on this platform will be the final plan.

⑤ This platform will record all electronic transactions. If there is any dispute, the platform will take the betting record as the standard.

4. If the platform finds that members make bets by improper means (using plug-in programs) or conduct individual or group betting in any abnormal way that is harmful to the interests of the platform, the platform reserves the right to cancel such bets and The bonus generated by the bet, and the member account will be deactivated. Whether an agent or a member, who discovers a loophole and conceals it without reporting it, exploits the loophole to maliciously swipe money, cheats through illegal means, or spreads rumors and slanders, or attacks the platform, the account will be frozen permanently and unconditionally after verification by the platform, and all the money in the account will not be refunded.

5. If the platform finds that a member has repeatedly applied for an account, it has the right to take risk control measures: including but not limited to freezing the relevant member account, recovering the gifts that have been given, deducting game profits, etc. Each player, each address, each email address, each phone number, the same wallet address, the same IP or IP segment, and a shared computer environment (such as

Internet cafes, other public computers, etc.) can only have one member account.

6. After recharging, the user must generate 100% of the deposit amount in the game before withdrawing money (excluding activities), otherwise the finance will not accept it.

7. The platform customer service telegram online customer service, others are fake, please keep in mind that the platform is not responsible for being deceived by such problems.

8. Please check the platform recharge address clearly to avoid recharge errors. If the user enters the wrong recharge address and the currency is lost, the user is responsible for it, and has nothing to do with the platform.

9. The platform will require players to provide supporting documents when necessary to verify the player's identity. When notified, players must complete the review process before receiving bonuses or withdrawals. If the player does not provide the certificate verification as required, he agrees to automatically give up the full balance of the account.

10. The platform prohibits the same agent from opening different agent accounts to transfer team bets. Once found, it will be regarded as arbitrage, and the platform has the right to terminate the cooperative relationship and recover all the resulting profits. At the same time, we

reserve the right to pursue further accountability.

Responsibility Statement

1. Users must be over 18 years old to use the services of this platform, please do not indulge in the game.

2. Any operation performed after logging in with the account and password on this platform shall be regarded as a valid operation. Users are responsible for protecting their accounts, passwords and other personal privacy information. If the user's personal data is improperly protected and the account is stolen (such as the Trojan virus, etc.), the user should immediately notify the superior agent or the platform to freeze the account, modify the data, and terminate the loss; The platform is not responsible for compensation.

3. The platform recommends users to perform important operations such as personal password modification, betting, recharge, and withdrawal on the platform. The platform will not entrust others (any individual or group) to perform the above operations for the user, and the platform will not be liable for any losses caused by the user's operations by others.

4. The mailbox bound by the user on this platform must be authentic and valid; once the mailbox is bound, it cannot be modified. The platform does not assume any responsibility for losses caused by personal mistake

binding.

5. This platform reserves the right to revise and update these terms and platform game rules from time to time. The revised and updated terms and game rules will take effect when they are published. When the user continues to use the services of this platform after the above-mentioned revisions and updates are published, it is deemed that the user agrees to and accepts the revision and update of the terms and game rules of this platform.

6. This platform reserves the right to interpret and amend other unexplained matters or disputes.

in conclusion

CCCTRX.com was originally conceived to bring the best solution to a real problem: the structural challenges affecting the traditional gaming industry. At the same time, it provides unique advantages and innovative functions on the basis of this solution. We believe that we can achieve this feat by developing a decentralized platform. The platform incorporates modern blockchain technology, divisive gamification, and is absolutely user-friendly.

The CCCTRX.com platform will provide players with a truly engaging and rewarding experience. Its superior security, transparency and simplicity will open doors to a whole new target audience.

recreational gamers and non-gamblers who shy away due to trust issues and the complexity of current solutions.

CCCTRX.com also has the advantage of attracting companies and enterprises. To develop the ecosystem associated with the platform, we will cater to entities such as traditional gaming establishments, third-party developers and turnkey clients.

Our vision is to create the best gaming platform on the market, expand it from virtual currency to various content, gain a large user base, and achieve solid financial growth.

The process of realizing this vision was not easy, and the end goal was very ambitious. But we have the team, the capabilities and the passion to make this vision a reality.

If you have any questions or just want to get in touch with us, we'd love to hear from you on any social channel.

Thank you!

, The CCCTRX.com Team
